PROFESSIONAL OVERVIEW

Full Stack Software Engineer with 5+ years of experience driving technical execution across fintech within Fortune 500 Enterprise environments. Deep core expertise in Angular, JavaScript, and Java. Proven track record of delivering high-impact business outcomes, including deliverables for Vanguard Digital Advisor used by over 800,000 clients and advisors, identifying fraudulent credit card transactions via a full-stack fraud application at Bank of America, and creating a point of sale (POS) system for a local retail business.

TECHNICAL SKILLS

- Languages & Frameworks: Angular, JavaScript, Java, HTML, CSS, DB2, DynamoDB, PostgreSQL, JQuery, NodeJS, Express.js, OracleDB
 - Tools & Platforms: Bitbucket, Git, Bamboo, Jira, SonarQube, Splunk, AWS, VS Code, IntelliJ, ChatGPT, Google Gemini, OpenClaw, Kimi K2.6
 - Methodologies: Agile, Scrum, CI/CD, TDD, System Architecture
-

PROFESSIONAL EXPERIENCE

Insurance Web App Project – Remote

Full Stack Developer | Jan 2025 – Present

- Spearheading the architecture and development of a responsive insurance web application utilizing the Angular framework, optimizing frontend performance and user onboarding workflows

- Accelerated software development lifecycles by leveraging advanced AI tools, including ChatGPT and Google Gemini, to rapidly prototype and "vibe code" core application components

Vanguard – Hybrid

Full Stack Developer | *April 2022 – October 2024*

Vanguard is a privately held financial company of 20,000 employees, specializing in index funds to help individuals reach their retirement goals

- Developed Spring Boot microservices with IntelliJ IDE, enhancing backend performance to ensure seamless operations
- Implemented features for Angular application with VSCode IDE used by over 90% of clients and advisors
- Mentored junior team members, resulting in team velocity increase
- Core Stack: Angular, Java Spring/Boot, DB2/DynamoDB

Bottle and Cork Liquor – Hybrid

Web Developer | *April 2020 – April 2022*

Retail liquor store located in Towson, Maryland seeking to modernize the business

- Designed a custom Point-of-Sale (POS) system to optimize transaction workflows and improve customer service checkout time by 30%
- Engineered responsive, user-friendly frontend interfaces using JavaScript, HTML, and CSS to eliminate navigation lag, boosting web application performance and user retention by 20%
- Architected backend using Node.js and Express.js to support data operations and request processing
- Optimized database interactions within PostgreSQL to eliminate storage inefficiencies, maintaining absolute data integrity and reducing query response times by 5%
- Core Stack: JavaScript, HTML, CSS, PostgreSQL

Bank of America – On-Site

Full Stack Developer | *September 2019 – April 2020*

Bank of America is the second-largest banking institution in the United States, with over 212,000 employees globally

- Spearheaded the construction of UI widgets using jQuery, HTML, and CSS to resolve user navigation bottlenecks, improving overall user experience ratings by 20%
- Engineered a connection between frontend elements and backend systems by integrating components with the Java MVC Spring Framework, reducing data latency by 10%

- Optimized legacy SQL scripts within Toad for Oracle DB to address slow data retrieval times, accelerating database operations by 5%
- Core Stack: jQuery, Java Spring, Oracle DB

Saint-Gobain – On-Site

Computer Programmer Analyst | *November 2018 – June 2019*

Saint-Gobain is a multi-conglomerate consisting of 162,000 employees that designs, manufactures, and distributes materials for the construction and industrial sectors

- Designed Excel data analysis templates to streamline operational metrics, empowering plant managers to make data-driven decisions that reduced production downtime by 10%
- Architected a data management workflow within the SAP system to eliminate cross-departmental information silos, improving data accuracy by 20% and accelerating reporting cycles

SAP America – On-Site

SQL Data Modeling/Reporting Specialist (Internship) | *May 2016 – June 2018*

SAP is the world's largest Enterprise Resource Planning (ERP) company in the world consisting of over 111,000 employees

- Engineered SQL views in SAP HANA Studio to eliminate data retrieval bottlenecks, accelerating access to critical data by 5% for key executive stakeholders
- Developed employee performance reports using Design Studio to address visibility gaps, providing leadership with insights that reduced review cycle times by 10%
- Fostered cross-functional alignment across international time zones by driving technical updates in weekly global Scrum calls, reducing project delivery delays
- Translated business requirements into targeted data architectures, eliminating development rework and ensuring 99% alignment with organizational strategic goals
- Programmed automated Python data-parsing scripts to replace manual CSV processing, reducing file preparation time

SAP America – On-Site

Mobile Web Developer (Internship) | *May 2016 – June 2017*

SAP is the world's largest Enterprise Resource Planning (ERP) company in the world consisting of over 111,000 employees

- Pioneered a Case Checker Application utilizing the SAPUI5 JavaScript framework to streamline escalation management, accelerating critical issue resolution times by 10%
- Architected a Pricing Application using SAPUI5 to eliminate manual calculation bottlenecks, increasing pricing accuracy and boosting customer engagement metrics by 20%

- Integrated OData services to bridge frontend interfaces with backend enterprise architectures, slashing data synchronization latency by 8%
- Optimized application responsiveness by executing asynchronous AJAX requests for microservices data retrieval, reducing page load times by 5%
- Stack: SAP UI5, SAP ABAP, OracleDB

Fiserv Inc. – On-Site

QA Analyst (Internship) | May 2015 – September 2015

Fiserv is a global leader in financial technology and payments processing with approximately 38,000 employees worldwide

- Spearheaded cross-platform testing for the Maestro Application across multiple operating systems, identifying and resolving bugs to optimize system functionality
 - Authored CSS customization documentation and style guides for application end-users, empowering clients to modify UI layouts to match their corporate branding standards
 - Calibrated and updated business rule logic within the Maestro Application, ensuring alignment with evolving corporate requirements and reducing execution errors by 10%
-

EDUCATION

Bachelor of Science in Software Engineering

Drexel University – Philadelphia, PA | 2018
